# Capture Management: Effective Use of Capture Tools

Dr. Jack Bailey, The Kyle Group LLC

December 11, 2023

### Dr. Jack Bailey, Managing Director

- Business Development (BD) professional and business educator;
  20 years experience
- Former Vice President of BD for Pacific Architects and Engineers (PAE) and DynCorp International – both now divisions of Amentum
- CF APMP and Shipley Associates Certified Professional Capture Manager (CPCM)

## The Kyle Group LLC

- The Kyle Group LLC (TKG) is a BD analysis and executive level training company
- We employ our proprietary *BD Forensics*<sup>(SM)</sup> methodology for conducting a holistic analysis of the BD function
- TKG provides organizational solutions and leader training on organizing, resourcing, planning and executing the BD function

### What are Capture Tools?

#### • They <u>are</u>

- Resources for organizing data, conducting analysis and creating solutions
- Usually graphs, charts and tables
- Enablers for financial modeling, comparison analysis and process development *Quick Tip #1: Processes include Transition-in, Task Order Management*
- They <u>are not</u>
  - The gate, step or milestone briefing
    - $_{\odot}$  The briefings communicate the information to leadership
    - $_{\odot}$  They may include images of the tools as part of it

## Why are they necessary?

- Develop solutions fully
  - $\circ$  Initial; and

• Refinement Quick Tip #2: pWIN Calculations are dynamic

- Standardize BD processes (repetition increases quality)
- Provides artifacts that can be used for analysis
- Effective contract transition

|           | Competency Match                               |  |  |  |  |  |  |
|-----------|--|--|--|--|--|--|--|
| <b>C1</b> | We do similar work                             |  |  |  |  |  |  |
| C2        | We have access to operational expertise/talent |  |  |  |  |  |  |
| С3        | We have teammates/suppiers who can support     |  |  |  |  |  |  |
| C4        | We have the operating systems/credentials      |  |  |  |  |  |  |
| C5        | We have the tools/equipment/etc.               |  |  |  |  |  |  |
|           | Past Performance Match                         |  |  |  |  |  |  |
| Ρ1        | We've worked for this customer previously      |  |  |  |  |  |  |
| P2        | We've worked for this end user previously      |  |  |  |  |  |  |
| Р3        | Our performance is recent (3 years)            |  |  |  |  |  |  |
| Ρ4        | Our performance is relevant (per Section L/M)  |  |  |  |  |  |  |
| Ρ5        | Our CPARs are complimentary                    |  |  |  |  |  |  |
|           | <b>Business Development Preparation</b>        |  |  |  |  |  |  |
| B1        | We responded to the RFI/sources sought         |  |  |  |  |  |  |
| B2        | We atrtended the industry day                  |  |  |  |  |  |  |
| <b>B3</b> | We received/reviewed the draft                 |  |  |  |  |  |  |
| B4        | We conducted a pursuit decision brief          |  |  |  |  |  |  |
| B5        | Our forecats of the RFP date was correct       |  |  |  |  |  |  |
|           | -  |  |  |  |  |  |  |
|           | No Bid Evaluate Bid                            |  |  |  |  |  |  |

**Purpose:** Calculating the probability of winning the effort

0-15

**16-30 31-45** 

#### **Difficulty Calculator**

**Purpose**: Calculating the pursuit difficulty; sometimes called an "adjacency chart"

## Example (Solutioning)

#### **Business Case R&O Summary**

| CLIN         | ITEM | Period | Remark |
|--------------|------|--------|--------|
| CLIN X01     |      |        |        |
| CLIN XO2     |      |        |        |
| CLIN X03     |      |        |        |
| CLIN X04     |      |        |        |
| CLIN X05     |      |        |        |
| G&A          |      |        |        |
| OVHD         |      |        |        |
| Fee          |      |        |        |
| Total Impact |      |        |        |

| Risks | Mitigation | Opportunities | Required Action(s) |
|-------|------------|---------------|--------------------|
|       |            |               |                    |
|       |            |               |                    |
|       |            |               |                    |
|       |            |               |                    |
|       |            |               |                    |

**Purpose:** Different from the bid case, its used to organize the key financial aspects of a program; the risks and opportunities and actions steps required.

## Systemic Challenges

- Tools aren't always addressed in policy
- Multiple variations of tools

- Capture is "slide deck centric"; few supporting artifacts exist
- Usually static and/or late stage
- Single sourced, and not always the right one

#### **Recommended Best Practices**

- Standardize them
- Include tools in the BD policy
- Train their use *Quick Tip #3: pWIN Calculations are done on yourself and each competitor*
- Provide a document control method to archive them
- Enforce their full usage; Quality Control
- Collaboration

### Capture Tip

- Gate/Step/Milestone Deck companion document
- Excel spreadsheet is one method
- Tabbed and pre-loaded with templates
- Capture is standardized and repeatable

#### Capture Tip
